Siegwerk UV technology know-how showcased at Converflex Europe 2006

Innovative technologies and products for UV printing

Annemasse, May 2006. The Converflex Europe exhibition is being held for the eighth time in 2006. This year, it will be organized jointly with the Grafitalia trade fair in Milan, Italy, from 9th to 13th May 2006.

These exhibitions dedicated to users of converting technologies including paper and corrugated board processing, packaging printing, tissue manufacturing, will also be a stage for special events such as forum, demos and conferences.

On Thursday 11th May, Siegwerk Ink Packaging will be on show with major complementors such as VTI, UV curing technology specialist, OMET, printing machine manufacturer and Air Liquide, through an innovative partnership based on a programme of conferences.

Siegwerk will be represented by Martial Buttin, Offset/UV Technology Strategy Senior Manager, with a presentation reviewing the “Evolution of UV inks for printing under inert atmosphere”.

A discussion with the conference attendees will close the program for additional information on how to take advantage of the most recent developments of graphic arts technology.
