LabelExpo Europe 2013: Siegwerk stages live demo with new ink series for LED UV technology

The world's leading trade fair for labeling is taking place in Brussels from September 24 to 27. In cooperation with machine producer Gallus, Siegwerk is presenting the latest developments in connection with LED UV technology.

At booth 11P10 in Hall 11, the two companies will be giving a live demonstration of the advantages of LED UV drying technology – using the new ink series Sicura Screen LEDTec and Sicura Flex LEDTec to print with a Gallus EM 280 LED machine.

“Visitors can witness the advantages of the new ink series first hand,” says Michael Müller-Samson, Vice President Business Unit Sheetfed & Narrow Web. “We will be running two printing jobs per day – at 11.30 am and 02.30 pm. Visitors can take printed samples home with them.”

Labelexpo Europe 2013 is the world's biggest trade fair for the labeling and packaging industry, with more than 550 exhibitors in seven halls. The organizers expect some 28,000 visitors.
