Siegwerk’s MyInkroom will digitize your ink rooms

Siegwerk's MyInkRoom application was created with one goal in mind: make your lives easier by automating current manual processes within your ink rooms.

Siegwerk’s innovative digital service, which is connected directly to your ink dispensers, monitors ink levels in real time and provides an alert when stocks fall below a minimum level. New orders are automatically based on the customer’s historical consumption data, delivery notifications are sent and inks are automatically added to the dispensing systems.

You are benefitting from lower frequency of orders, the ability to maintain dynamic safety stocks and optimal levels of ink inventories.

To learn more about MyInkroom in our short **video**. You would like to know more about MyInkRoom? Contact Ashish Yadav, Product Owner MyInkroom. (ashish.yadav(at)siegwerk.com)
