

Declaration of non use of

Toluene and other volatile aromatic hydrocarbons products offered for NP & H (“Nutrition”, “Pharma” & “Hygiene”) applications

In principle in the manufacture of **all** products supplied by Siegwirk and recommended for NP & H (“Nutrition”, “Pharma” & “Hygiene”) applications, toluene and other volatile aromatic hydrocarbons or raw materials containing these substances, are not used as intentionally added ingredients.

In particular, the following substances are excluded:

- Toluene
- Xylene (all isomers)
- Ethylbenzene
- Cumene
- Trimethylbenzene
- C9 aromatics in general
- C10-C13 aromatics in general

However, the presence of traces of these substances in the product coming from raw material impurities, from the process or as adventitious contaminants cannot be excluded. We proactively monitor and/or retrieve supplier data on impurities in raw materials likely to contain traces of these substances. We can assure you that potential traces of these substances will not exceed legal limits.

Additionally, as an exception, please note that in very few cases in the SEA and India region, toluene may be part of technologically indispensable raw materials.
