

Declaration of non use of

Nitromusk compounds such as musk ketone and musk xylene

In the manufacture of **all** products supplied by Siegwirk, nitromusks such as musk xylene (CAS 81-15-2) and musk ketone (CAS 81-14-1), or raw materials containing nitromusks, are not used as intentionally added ingredients¹.

The presence, however, of traces of these substances in the product coming from raw material impurities, from the process or as adventitious contaminant cannot be excluded².

¹ With the exception of very few fragrance inks, where the non-reported presence of nitromusks in fragrance raw materials cannot be fully ruled out.

² However, we proactively monitor supplier data on impurities in all raw materials likely to contain nitromusks. We can assure you that, according to the present scientific knowledge, potential traces of nitromusks in our products, if any, are far below 0,1%.
