

**Declaration of non use of**

**Persistent Organic Pollutants (POPs)  
covered by  
Regulation (EC) No 850/2004  
and its amendments**

In the manufacture of **all** products supplied by Siegwirk, persistent organic pollutants listed in annex I and III of Regulation (EC) No 850/2004, or raw materials containing these substances are not used as intentionally added components.

However, the presence of very minute but analytically detectable traces of these substances in the product originating from raw material impurities, from processes or as adventitious contaminant cannot be fully excluded.<sup>1</sup>

---

<sup>1</sup> However, we proactively monitor and/or retrieve supplier data on impurities in raw materials likely to contain traces of these substances. We can assure you that, according to the present scientific knowledge, potential traces of these substances in our products, if any, are far below 0,1%.
