

Declaration of non use of

Arsenic and arsenic compounds, antimony and antimony compounds of concern, red phosphorus and beryllium oxide

In the manufacture of **all** products supplied by Siegwerk the following substances and substance classes or raw materials containing them, are not used as intentionally added ingredients:

- Arsenic and arsenic compounds
- Highly toxic antimony and antimony compounds, such as antimony trioxide
- Organic antimony compounds
- Red phosphorus
- Beryllium oxide

The presence, however, of traces of these substances in the product coming from raw material impurities, from the process or as incidental contaminant cannot be excluded. However, we proactively monitor and/or retrieve supplier data on impurities of the above mentioned substances in all raw materials likely to contain such traces. We can assure you that potential traces in our products, if any, are, as a rule, well below 0.1%.

The information in this document reflects Siegwerk's policy and commitments. This statement is valid without signature.
