

Declaration of non use of

Mesylate esters (methyl sulfonic acid esters)

In the manufacture of **all** products supplied by Siegwirk, mesylate esters (methyl sulfonic acid esters), or raw materials containing mesylate esters (methyl sulfonic acid esters) are not used as intentionally added ingredients.

The presence, however, of traces of this substance in the product coming from raw material impurities, from the process or as adventitious contaminant cannot be excluded¹.

¹ However, we proactively monitor and/or retrieve supplier data on impurities of the above mentioned substances in all raw materials likely to contain such traces. We can assure you that potential traces in our products, if any, are, as a rule, well below 0,1%.

The information in this document reflects Siegwirk's policy and commitments. This statement is valid without signature.
