

Declaration of non use of

Nickel

In the manufacture of **all** products supplied by Siegwerk, nickel, or raw materials containing nickel are not used as intentionally added ingredients.

However, the presence of traces of this substance in the product coming from raw material impurities, from the process or as adventitious contaminant cannot be excluded.

We proactively monitor and/or retrieve supplier data on impurities of the mentioned element in all raw materials likely to contain such traces. It can be assured that potential traces in our products, if any, are, as a rule, well below 0.1%.

Specific inks designed exclusively for ink-jet applications may contain nickel as part of pigment complexes. Nevertheless, exemplary migration studies carried out according to Commission Regulation (EU) No 10/2011 have demonstrated that migration of nickel is by orders of magnitude far below legally set migration limits as defined in the Swiss Regulation on Food Contact Materials SR 817.023.21 and the EU REACH Regulation (EC) No 1907/2006, Annex XVII for the mentioned ink-jet applications.

The information in this document reflects Siegwerk's policy and commitments. This statement is valid without signature.
