

Declaration of non use of

Sulphur dioxide and sulphites with allergenic potential

In the manufacture of **all** products supplied by Siegwerek, sulphur dioxide and sulphites, or raw materials containing them, are not used as intentionally added ingredients.

The presence, however, of traces of these substances in the product coming from raw material impurities, from the process or as adventitious contaminant cannot be excluded¹.

¹ However, we proactively monitor and/or retrieve supplier data on impurities in raw materials likely to contain traces of such allergens. We can assure you that, according to the present scientific knowledge, potential traces of sulphur dioxide and sulphites in our products, if any, are well below 0,1%.

The information in this document reflects Siegwerek's policy and commitments. This statement is valid without signature.
