

# Ink Right, Every Time.

## MyInkroom Automated Inventory for Printing Success

MyInkroom provides insights into ink inventory management, order recommendations, and delivery processes optimizing ink handling and reducing waste. It integrates seamlessly with ink dispensing systems to provide real-time visibility into ink levels and usage patterns. Our tool compiles data for analytics and identifies cost-saving opportunities.

MyInkroom is not just a tool - it's your strategic partner in ink management. With its user-friendly interface and powerful functionalities, it empowers you to:

- Focus on your core business: Spend less time worrying about ink and more time on what matters most.
- Improve operational efficiency: Make data-driven decisions and optimize your production processes.
- Boost sustainability: Reduce waste and embrace eco-conscious practices in your ink management.

Ready to unlock the potential of your ink inventory?  
MyInkroom is the key.

### Key Features:

#### Real-time Inventory Monitoring

Real-time tracking of ink levels in the dispensing system. MyInkroom helps maintain optimal stock levels and eliminate waiting times on production or operations

#### Automated Online Ordering

Generate automated replenishment orders based on real-time inventory levels and usage patterns

#### Download Datasheets

Access to safety data sheet (SDS) and other important documents

#### Detailed Reporting and Analytics

MyInkroom generates detailed reports on ink inventory, usage, and in depth analytics

**MyInkroom takes the guesswork out of ink stock management for our customers. Real-time ink consumption and stock visibility empower the digital order-to-delivery process, ensuring customers have the right ink in the right quantities at the right time.”**  
Ashish Yadav, Product Owner MyInkroom.

# INK MANAGEMENT MADE SIMPLE.

“

Digitalization is key to the future. The strategic shift is about more than machines or AI. It's about integrating technology seamlessly into the printing workflow, optimizing data management, and offering a holistic service experience.

Mohamed El Ashmawy,  
CIO

## Vision for MyInkroom

Bridging the gap between ERP and dispensers, MyInkroom's future vision is to automate the processes from color matching to ink dispensing and return management, eliminating manual calculations and reducing errors.

MyInkroom aims to enhance workflow management through the digitization of tasks from planning to ink dispensing and press support improving overall production flow.

The role of Myinkroom is to optimize processes by providing real-time insights and predictions in ink handling usage, empowering informed decision-making. MyInkroom's momentum continues! The growing customer base exceeds 250!

This rapid expansion signifies the increasing need for innovative solutions in ink management.

Currently, MyInkroom has customers in key regions like EMEA, CUSA, LATAM, India, SEA, and China.

## Sustainability KPI's

MyInkroom contributes to sustainability in several ways, both environmentally and economically.

- Reducing waste: By eliminating excess inventory through smart algorithms, Myinkroom helps to maintain optimal stock levels.
- Lowering environmental impact: Reducing the number of deliveries translates to less transportation, and advanced return ink utilization ensures the reuse of standing inventory.
- Enhancing efficiency: Streamlining printing processes through accurate forecasts.

By optimizing ink usage and reducing waste, MyInkroom grants businesses to achieve their sustainability goals.
